

RAC ARC | HALF ARC | UMBRELLA ARC | TUBE ARC | CAR ARC | BUS ARC | HOUSE ARC | AD ARC | TRANSIT ARC | LOOP ARC

RAC ARC

The Rac Arc was designed to offer basic, affordable, and attractive bicycle parking. It is a unique design that organizes and honors the bicycle while offering superb security. The design offers a variety of configurations adaptable to commercial and public realms, but is equally effective for use in a single-family home. The Rac Arc can also cantilever over existing or proposed landscaped areas.

Price: \$279.99 per unit*

*one Rac Arc unit stores one bike

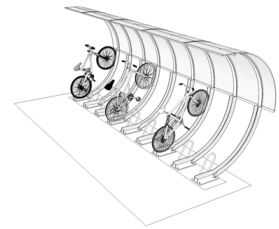

HALF ARC

The concept of the Half Arc stemmed from the need to offer cyclists' security as well as weather protection for their bicycles. Using the Arc design from the original Tube Arc, the Half Arc once again offers outstanding security in a light, small footprint.

Price: \$1399.99 per unit*

*one Half Arc unit stores two bikes

Please note that additional split-unit fees apply to Half Arc's that store an odd number of bikes. Complete units (even number pairings) are encouraged.

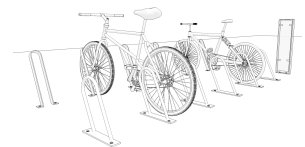

LOOP ARC

The Loop Arc offers simplicity, affordability, and usability. Similar to the rest of the Bike Arc family, it maintains the organization of bicycle parking by providing each bike a designated "parking spot." As the Loop Arc is two separate pieces, one that supports the front wheel and one that locks to the frame and back wheel, it can be used in a variety of locations and situations including sloped areas or on uneven ground. The Loop Arc works with all different types of bikes (including those with baskets) and no lifting is required.

Price: \$149.99 per unit*

*one Loop Arc unit stores one bike

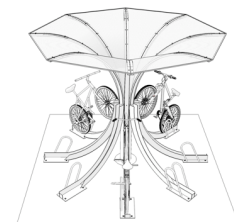

UMBRELLA ARC

The Umbrella Arc organizes bicycles in a beautiful and efficient manner. It combines the ease of use of the Rac Arc with sculptural organization. It offers an efficient use of space while providing shelter for bicycles in inclement weather. The Umbrella Arc effectively and securely parks 8 bicycles in less than 50 square feet.

Price: \$6499.99 per unit*

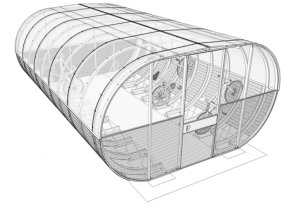

*one Umbrella Arc unit stores eight bikes

Prices include *either* standard painting, standard powder coating, *or* galvanizing unless otherwise noted and exclude shipping, tax, and installation. Painted and powder coated units require additional handling fees. Renderings are representations only and do not necessarily depict unit quantities.

TUBE ARC

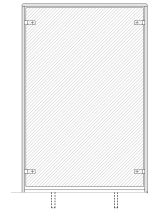

The Tube Arc is the flagship of the Arc offerings. Each of the other Arcs was born out of this modular elegant design. The Tube Arc offers exceptional security, ease of use, and complete protection for the bicycle from the elements. The design was conceived to offer flexible, easy-to-install (assembled on site) bicycle parking structures with a “light” approach. The Tube Arc is adaptable from 16 bikes to upwards of 60 per unit.

AD ARC

The Ad Arc is a street level barrier screen that has the potential to display a variety of imagery depending upon the use. Each screen is fabricated from galvanized steel flat bars (fixed Ad Arc) or aluminum (removable Ad Arc) framing a transparent polycarbonate printed screen. Each panel can be easily and affordably replaced on a regular basis allowing users to frequently update their display such as a restaurant owner revising a menu or retail products. The size of the seating screen is also flexible, ranging from 2' to 4' in length and 3' to 5' in height to fit into every application.

Price:

Removable 2' wide by 3' high Ad Arc (aluminum): \$229.99* *Painting available starting at \$60.00 per unit*

Removable 2' wide by 5' high Ad Arc (aluminum): \$299.99* *Painting available starting at \$85.00 per unit*

Fixed 2' wide by 3' high Ad Arc (galvanized): \$189.99* *Painting available starting at \$60.00 per unit*

*Ad Arc prices do not include the printed acrylic panel (by others). Bike Arc has worked with San Jose Blue for these panels and highly recommends their services as they are familiar with the Ad Arc and have ability to print on the plexi-glass material in different thicknesses (1/4" minimum is required for the Ad Arc).

Prices include *either* standard painting, standard powder coating, *or* galvanizing unless otherwise noted and exclude shipping, tax, and installation. Painted and powder coated units require additional handling fees. Renderings are representations only and do not necessarily depict unit quantities.
